---

### Designing With Light : About US

The profession of architectural lighting design is a relatively young industry, even though the practise of what we do in determining where there is light and where there isn ' t has been around for centuries. Of course back then this was simply people deciding where to put candles or, as far back as the 9 th century, where to locate oil lamps.

---

### Confessions of a lighting designer – what is lighting design?

Architectural lighting focuses on three aspects of the illumination of buildings or spaces. The first architectural element is the aesthetic appeal of a building, which is important in the illumination of retail environments. Second, the ergonomic aspect: the measure of how much of a function the architectural lighting plays.

---

### Architectural Interior Lights | Lighting Styles

DESIGNING WITH LIGHT Architecture is reliant upon light to give it form, to allow us to understand its nuances, spatial qualities, and material conditions. We approach lighting design with the architect as collaborator – helping designers of space and material execute their visions and make real the imagined atmospheres.

---

### Lighting Design | Lam Partners | Architectural Lighting Design

Fewer still are the books devoted to architectural lighting design, or, one might say, to the designing of architectural light. The recently published Architectural Lighting: Designing with Light and Space (\$24.95, Princeton Architectural Press, March 2011), helps fill that void.

---
