## By Karen Braun

Activity-based costing (ABC) is a costing method that identifies activities in an organization and assigns the cost of each activity to all products and services according to the actual consumption by each. Therefore this model assigns more indirect costs into direct costs compared to conventional costing.. CIMA, the Chartered Institute of Management Accountants, defines ABC as an approach to ...

*Tuesday chapter 7.pdf - Tuesday chapter 7*  
*Tuesday 1:58 PM ...*

Activity-based costing attempts to overcome the perceived deficiencies in traditional costing methods by more closely aligning activities with products. This requires abandoning the traditional division between product and period costs, instead seeking to find a more direct linkage between activities, costs, and products.

and Study Sets ...*

activity-based costing (ABC) system first assigns costs to activities and then traces costs from activities to products. ABC assumes that activities consume resources, and products and other cost objects consume activities. ABC cost assignment is made possible through the identification of activities, their costs, and the use of cost drivers.
