The following email is fairly common in my line of work. It seems there are a number of airplanes (not just Taylorcrafts) out there with Continental A75 engines that have been substituted in place of Continental A65 engines. This is a logical upgrade and one that for many years was considered a benign change to the aircraft.

Impulse Mags and the Continental A65- 8 Engine. Author: John Propst Technical Advisor: Bill Pancake. Abstract– Installation of an impulse magneto on the right side of a Continental A65-8 engine may result in an interference fit between the end of the magneto and the back of the engine crankcase. When Continental A65-8 engines were originally manufactured, they had a single impulse magneto mounted on the left side of the engine and a non-impulse magneto mounted on the right side of the engine.

United States Army, the United States Marine Corps, the United States Coast Guard, the Air and Army National Guard, and by various NATO and allied nations as well as a number previously operated by opposition forces in peace and war. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active flying squadrons both at home and overseas. 160 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to American military aircraft. For those who like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers have been included, along with a list of aircraft held in each museums current inventory or on display as gate guardians throughout the State of Florida. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Floridas heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition. This guide-book should help you to find and view Floridas Warplane survivors.
