Dryland degradation and desertification now affect almost a billion people around the world. Tragically, the biological

resources and  
productivity of millions  
of acres of land are  
lost to desertification  
each year because  
people remain  
unaware of strategies  
and techniques that  
could improve yields,  
reduce risk, and begin  
healing the world's  
deserts. A Guide for

Anna Freud and

The concluding chapter is on the
