Follow a time line of physics history and one thing becomes readily apparent - many of this century's major milestones were first documented in the pages of "The Physical Review." Now the most important of this research is brought together in this landmark book and CD-ROM package. Along with the celebrated work of luminaries such as Langmuir, Bohr, Wheeler, Feynman, this volume brings to light more obscure, though no less critical research. Together with papers from Physical Review Letters, this unique work puts more than 1,000 papers at your fingertips.

An anthology of works covering the radical philosophical movement dating from Descartes to Leibniz. As much as possible, texts are presented whole, with associated texts by Bacon, Galileo, Pascal, Hobbes, Malebranche, and Newton rounding out the view of major works including Descartes's Meditations, Spinoza's Ethics, and Leibniz's Monadology. Suitable for a one-semester or quarter course covering the Rationalists, the readings are mostly drawn from the first third of the author's anthology Modern Philosophy: An Anthology of Primary Sources. Annotation copyrighted by Book News Inc., Portland, OR

This book invites the reader to understand our Universe, not just marvel at it. From the clock-like motions of the planets to the catastrophic collapse of a star into a black hole, gravity controls the Universe. Gravity is central to modern physics, helping to answer the deepest questions about the nature of time, the origin of the Universe and the unification of the forces of nature. Linking key experiments and observations through careful physical reasoning, the author builds the reader's insight step-by-step from simple but profound facts about gravity on Earth to the frontiers of research. Topics covered include the nature of stars and galaxies, the mysteries of dark matter and dark energy, black holes, gravitational waves, inflation and the Big Bang. Suitable for general readers and for undergraduate courses, the treatment uses only high-school level mathematics, supplemented by optional computer programs, to explain the laws of physics governing gravity.

7 NEET/ AIIMS/ JIPMER 2018 Year-wise Solved Papers with 3 Mock Tests consists of 2018 Year-wise 4 Solved Papers + 1 Mock Paper of AIIMS, 2 Solved Papers + 1 Mock Paper of JIPMER & 1 Solved Paper + 1 Mock Paper of NEET. The book contains 1960 past MCQs - 620 each in Physics, Chemistry & Biology. The students can also appear in these tests as Practice Sets.
