Here are my plans for a 120% size FT3D. I think it hits the sweet spot of size, weight and power, and it flies easily on common 3s-2200 batteries. This plane is 20% larger than the original, giving it 44% more wing area, enabling it to loft a heavier motor and battery while still maintaining a very light wing loading.

From the Publisher: Ted W. Lawson's classic Thirty Seconds Over Tokyo appears in an

enhanced reprint edition for the sixtieth anniversary of the legendary Doolittle Raid on Japan. "One of the worst feelings about that time," Ted W. Lawson writes, "was that there was no tangible enemy. It was like being slugged with a single punch in a dark room, and having no way of knowing where to slug back." He added, "And, too, there was a helpless, filled-up, want-to-do-something feeling that [the Japanese] weren't coming -- that we'd have to go all the way over there to punch back and get even." Which is what "the Tokyo Raiders" did. Lawson gives a vivid eyewitness account of the unorthodox assignment that eighty-five intrepid volunteer airmen under the command of

celebrated flier James H. Doolittle executed in April 1942. The plan called for sixteen B-25 twin-engine medium bombers of the Army Air Forces to take off from the aircraft carrier Hornet, bomb industrial targets in Japan, and land at airfields in China. While the raid came off flawlessly, completely surprising the enemy, bad weather, darkness, and a shortage of fuel caused by an early departure took a heavy toll on the raiders. For many, the escape from China proved a greater ordeal. This anniversary edition features a foreword by noted aviation writer Peter B. Mersky and an introduction by Mrs. Ellen R. Lawson, Ted Lawson's widow, as well as twice as many photographs as the
