### Parallel Scientific Computing in C++ and MPI

During my senior year in high school I became interested in game theory. At that time I also learned my first programming language, FORTRAN, in a summer course at the University of Stuttgart. The ...

Designed for experienced FORTRAN programmers interested in learning C, this text focuses on C programming as opposed to the C language syntax. The book compares the two languages, and identifies the counterparts in C to certain FORTRAN facilities, as well as those C facilities for which there are no FORTRAN counterparts. The text contains examples.

Chapters: on heterogeneous GIS, architectures, spatial data models, transactions and database languages; database language SQL: emerging features for GIS applications; proposed spatial data handling extensions to SQL; a GIS perspective on spatial and object oriented extensions to SQL; conceptual folding and unfolding of spatial data for spatial queries. Illustrated.

Written for readers familiar with at least one procedural programming language. Focus is on novel aspects of Ada. Includes an ATandT diskette of examples. Annotation copyrighted by Book News, Inc., Portland, OR
