The pressure washer has had an empty gas tank for that long. And just as a note: the second oil change was drained and the plugs left out in order for any fugitive gasoline from the oil-gas mix to evaporate. Thanks for taking the time to try to help. I look forward to hearing from you. Nancy Honda 5.5 hp GX160 engine

To change the oil in your Honda engine, start it up and let it run long enough to warm the oil to ensure it will flow smoothly when drained. Turn the engine off, and place a shallow bucket or drain pan beneath the drain plug on the engine. Remove the drain plug and the oil filler cap to allow good oil flow, and allow the oil to drain into the pan.

Honda manufactures four engine models for its gas-powered lawn mowers at time of publication: the GCV 160, GXV 160, GCV 190 and GSV 190. All are air-cooled, four-stroke engines that use the splash oil lubrication system where a dipper scoops up oil from the oil pan and splashes a fine mist into the engine . The GXV 160 has a .69-quart oil capacity.

Honda ' s GC and GS engines use the world ' s first small engine internal timing belt, designed to last the lifetime of the engine. Small engine timing belts are usually external and are subject to wear caused by dirt. Honda ' s internal timing belt runs in oil, eliminating the need for conventional drive gears. This design:

Yeah, just went thru that with a GX340 engine on my pressure washer - the thing acted like a fuel problem. It would start and run OK at idle, but under load it would run maybe 15-20 seconds and die - if I was quick enough, choking it would SOMETIMES keep it from dying. Checked the in-tank fuel filter, looked NEW.Pulled float bowl, flushed out everything with the nastiest carb cleaner I could ...
