up, or 6", from the finished stub height. In this case 14" minus 6" = 8". Step 2. Mark the conduit 8" from the end. Step 3. Line up the Arrow on the bender with the mark on the conduit and bend to 90°.

Bender Guide - Lowe's

1. A proper bend is made by rolling the conduit about the bender in the conduit's cradle using all foot pressure.
2. Use the correct size bender for the conduit size being bent.
3. Some over bending may be required to allow for spring back of the conduit. The resting condition of the conduit is to be at the final angle desired.
- 4.

Ideal Bender Guide - Yumpu

Accurate Stubs 1. Determine the height of the offset/stub up, for this example it is 11" (Figure 1). 2. For this example a 1/2" pipe will be used, so subtract 5" from the height of the offset. 3. Mark the conduit at height of 5" (make the mark all of the way around the conduit so it can be seen when it

If you are wanting an offset of 2 1/8" at 22 degrees, the distance between marks is 4 1/4" (2 1/8 X 2). There is no deduct except when doing 90 degrees on a hand bender. There will be some "shrinkage", which can be found by the math formula of $\text{Shrink} = 4.25 - 4.25 * \cos(22) = .31$ " in your case.
