Pushdown Optimization for SAP HANA The PowerCenter Integration Service can push transformation logic to SAP HANA sources and targets when the connection type is ODBC. For more information, see the Informatica PowerCenter 9.6.0 Advanced Workflow Guide

PowerCenter - docs.informatica.com

Introduction of Informatica PowerCenter. The Informatica PowerCenter is defined as ETL (extraction, transformation, and loading) tool that is widely used for creating the data warehouses which are used in industries. The Informatica PowerCenter has various components that are used to extract the data from the source, then convert the data into some form as per business requirements and then load the data at the destination data warehouse.
