Chemistry , Sixth Edition is designed to map to the way students seek and process information. McMurry/Fay's text helps students and professors get to the heart of chemistry more effectively, and helps students see the connections to chemistry more clearly. With its spacious, unintimidating design and clear, direct writing style, this text is known for a smart, precise presentation that blends the quantitative and visual aspects of general chemistry.

The author of more than 100 research papers, Professor McMurry is best known scientifically for his development of the McMurry reaction, in which two molecules of ketone or aldehyde are coupled to give an alkene when treated with titanium(III) chloride and a reducing agent such as Zn(Cu). The reaction has been widely used by the chemical community in the laboratory synthesis of many complex organic molecules and by the pharmaceutical industry in the commercial synthesis of several drugs.
