With the recent new and radical developments in the health care field that have been introduced at a breathless pace, nurse administrators must work to stay informed of the developments that affect their nursing departments both directly and indirectly. The Nursing Administration Handbook has a long track record, both as a textbook and as a hands-on tool for nurse executives seeking insight and step-by-step guidance in all aspects of administration. The fourth edition of this text surveys the entire field of nursing administration and incorporates the most significant new developments and current practices.

Focuses on the communication skills that are the key to good documentation.

Maternal and Infant Assessment for Breastfeeding and Human Lactation: A Guide for the Practitioner, Second Edition explores the characteristics of breastfeeding problems that can be seen, heard, or observed, and allows the assessor to distinguish between breastfeeding problems and actual medical issues. This text is designed for healthcare professionals who are responsible for developing a process for determining the breastfeeding status of mothers and infants. While past experience can provide some direction for exploration, a thorough assessment demands detailed examination of the unique aspects of the new situation. Assessors must individually tailor their approach depending on the circumstances; this text offers appropriate solutions to various potential issues. The second edition of Maternal and Infant Assessment for Breastfeeding and Human Lactation includes extensive new colored pictures and diagrams, as well as additional key information on the challenges of breastfeeding a premature infant.
