Sartorius Biostat B Manual

The Biostat® B is our universal benchtop controller for stirred and rocking motion systems. The multi-talented control tower opens up a new world of flexibility for your changing requirements. Use it as single or twin configuration, choose your cultivation chamber from our proven range of options: Conventional stirred-tank Univessel® Glass

---

Biostat® B - Benchtop Bioreactor Controller | Sartorius

The Industry Standard Bioreactor for Advanced Process Optimization and Characterization The Biostat® B-DCU is a fermenter | bioreactor specifically designed to accommodate the requirements of process optimization and characterization in the biotech and biopharmaceutical industry.

---

Biostat® B-DCU - Industry Standard Bioreactor | Sartorius

Biostat STR® bioreactors and Flexsafe STR® bags range from 50L to 2000L and can help you achieve outstanding speed, quality, and flexibility in your process development and commercial manufacturing operations. Accelerate your success with a stable, predictable process that delivers a safe, reliable biologic medicine for patients around the world.

---

Biostat STR® Generation 3 Single-Use Bioreactor | Sartorius

The Biostat® B is our universal benchtop controller for stirred and rocking motion systems. It is available with the RM Rocker for advanced process control featuring pH, DO and BioPAT® Viamass. The system is fully configurable and can therefore serve various process needs, from process development to small scale commercial production.

---

Biostat® RM - Wave-Mixed Bioreactor | Sartorius

Engineering by Sartorius BBI Systems BIOSTAT®B plus integrated system solution... .. ready to use packages for your drug discovery and small-scale-production BIOSTAT®B plus are designed to become the new benchtop systems standard in research fermentors and bioreactors, worldwide.

Sartorius Biostat B Manual - thepopculturecompany.com

The Biostat® Cplus is a Sterilizable-In-Place (SIP) Fermenter | Bioreactor developed for the cultivation

of microorganisms and cell cultures. Culture vessels with working volumes of 5 L, 10 L, 15 L, 20 L and 30 L are available. With more than a thousand installations worldwide, the Biostat® Cplus is the most successful stainless steel bioreactor of its class and is now available in the ...

---

Biostat® Cplus - Stainless Steel Fermenter ... - Sartorius

The Biostat® D-DCU is a compact bioprocess system available in microbial or cell culture versions with vessel choices from 10 to 200L working volume. The optimized and proven design of the Biostat® D-DCU is the result of thorough analysis of the most required features and functions from over thirty years of stainless steel fermenter | bioreactor design experience.

---

BIOSTAT B | Sartorius

As a result, Biostat® A does not require any manual adjustment of flow meters and therefore eliminates problems with pulsed aeration. Setting up the bioreactor is straightforward: Just connect the aeration tubing, configure the aeration profile, enter the DO setpoint - that's it! For cell culture applications, interfaces for four gases (air, O2, CO2 and N2) are available for DO and pH ...

---

Biostat® A - Entry-level Bioreactor & Fermenter | Sartorius

The Biostat®B is a compact benchtop fermentor with autoclavable culture vessels. With vessels having working volumes of 2l, 5l or 10l, the Biostat®B supports both microbial and cell culture applications. The bioprocess capabilities of the Biostat®B include batch, fed-batch and continuous processes alike.
