Company

General Specifications Timken industrial seals offer a leading combination of quality, technology and high performance. However, there are additional considerations - such as shaft finish, temperatures and other operating factors - that can help our seals achieve even higher levels of performance. We recommend the following practices

SEAL SPECIFICATION GUIDE The Timken Company, known for its top-quality line of bearings, has extended its product line to include seals. Timken, with 77 seal patents, already had the product knowledge for seal design. In fact, it was only natural for Timken to extend this experience into a complete line of seals for the automotive aftermarket. Each and every seal sold by Timken is manufactured with the same quality that goes into every Timken bearing.

Product description Timken Seals are designed to prevent leakage around valves, shafts, and other moving parts of the vehicle. They prevent fluid from leaking out between the shaft and the housing. These seals prevent abrasives, corrosive moisture and other harmful contaminants from entering the machines.
