Origins of agriculture | Britannica

Localised climate change is the favoured explanation for the origins of agriculture in the Levant. When major climate change took place after the last ice age (c. 11,000 BC), much of the earth became subject to long dry seasons. These conditions favoured annual plants which die off in the long dry season, leaving a dormant seed or tuber.

History of agriculture - Wikipedia

Early development The development of agriculture involves an intensification of the processes used to extract resources from the environment: more food, medicine, fibre, and other resources can be obtained from a given area of land by encouraging useful plant and animal species and discouraging others.

Origins of agriculture - Early development | Britannica

The Origins of Agriculture It appears that the transition to agriculture was not an abrupt change; the road from gathering plants in the wild, then cultivating and finally domesticating them, was long and convoluted.

The Origins of Agriculture - The Great Courses Daily

The domestication of plants and the origins of agriculture was a pivotal transition in human history, which occurred several times independently around the world. Rice was just one of the many species domesticated around the world. Current scholarly estimates are that plants were domesticated in perhaps 20 different areas around the world.

The Origins and Spread of Agriculture | Rice - UCL ...

How agriculture and domestication began. Agriculture has no single, simple origin. A wide variety of plants and animals have been independently domesticated at different times and in numerous places. The first agriculture appears to have developed at the closing of the last Pleistocene glacial period, or Ice Age (about 11,700 years ago). At that time temperatures warmed, glaciers melted, sea levels rose, and ecosystems throughout the world reorganized.

Origins of agriculture - How agriculture and domestication ...

Traditional farming (of many particular kinds in different eras and places) was the original type of agriculture, and has been practiced for thousands of years. All traditional farming is now considered to be " organic farming " although at the time there were no known inorganic methods.

History of organic farming - Wikipedia

Agriculture is the science and art of cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago, nascent farmers began to plant them around 11,500 years ago.

Agriculture - Wikipedia

Some of the world's most important crops, including rice and soybean, originate from eastern Asia. This region is also the original home of several minor crops, such as buckwheat and certain types of millet. In their search for the earliest farms, archaeologists have been drawn to China's two major river valleys: the Yellow River in the north and the Yangtze River in the south. Grains of ...

Origins of Agriculture in East Asia | Science

Further information: Economics of English agriculture in the Middle Ages and Economy of England in the Middle Ages § English agriculture Farming was introduced in the British Isles between about 5000 BC and 4500 BC from Syria after a large influx of Mesolithic people and following the end of the Pleistocene epoch.

Agriculture in the United Kingdom - Wikipedia

Map of the world showing approximate centers of origin of agriculture and its spread in prehistory: the Fertile Crescent (11,000 BP), the Yangtze and Yellow River basins (9,000 BP) and the New Guinea Highlands (9,000–6,000 BP), Central Mexico (5,000–4,000 BP), Northern South America (5,000–4,000 BP), sub-Saharan Africa (5,000–4,000 BP, exact location unknown), eastern North America (4,000–3,000 BP).

Neolithic Revolution - Wikipedia

In the earlier stage, dating roughly from 9500 to 7500 bp, agriculture was being established in parts of Pakistan, in the northwesternmost part of the subcontinent. At the ancient site of Mehrgarh, where the earliest evidence has been found, barley was the dominant crop and was apparently supplemented with some wheat.

Origins of agriculture - The Indian subcontinent | Britannica

Agriculture in ancient Asia On his way across the Pamirs in search of Buddhist texts (518 ce), the Chinese pilgrim Song Yun noted that the crest of the bare, cold, snowy highlands was commonly believed to be " the middle point of heaven and earth " : Herding goats along the ancient Silk Road, northern Takla Makan Desert, China.
